## **Terms of Use**

The terms of use for this study can be found at:  
<http://www.icpsr.umich.edu/icpsrweb/ICPSR/studies/2760/terms>

## **Information about Copyrighted Content**

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

**NOTICE**  
**WARNING CONCERNING COPYRIGHT RESTRICTIONS**

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

**ICPSR PROCESSING NOTES FOR #02760**  
*Midlife in the United States (MIDUS 1), 1995-1996*  
DS 1: Main, Siblings and Twin Data

**1. Variable Differences:**

- a. The variables **QA35** and **QS11a** that occur in the questionnaire documentation for dataset 1 (Main, Siblings, and Twin Data), can be found in dataset 3 (Coded Text Data); no further information was provided.
- b. Some variables that are referenced in the Questionnaire documentation are not included in the data set released by ICPSR; no further information was provided.

**2. Constructed and Derived Variables:**

- a. Some scales and variables in the collection were constructed to measure psychometric and psychosocial factors. Users are encouraged to refer to the constructed variables documentation included with this data collection for additional information.
  - b. Occupational variables were coded to coincide based on the 1980 Census occupational codes. Users are encouraged to refer to the occupation coding documentation included with this data collection for additional information.
3. **Value Difference:** According to the Self-Administered Questionnaire documentation provided by the P.I., variable **A1SI19** had a value of 5 "No". ICPSR recoded this value to 2 for consistency with other variables in the dataset.
4. **Variable Links:** The variable **M2ID** is the individual-level linking variable for the MIDUS datasets. The variable **M2FAMNUM** is the household-level linking variable for the MIDUS datasets.
5. **Weight Variables:** This collection includes the weight variables that should be used in any analysis. These sampling and post-stratification weights were created for the national Random-Digit Dialing (RDD) sample. For additional information, please refer to the weighting documentation provided for the data collection.
6. **Additional Information:** For additional information on the Midlife in the United States (MIDUS 1), 1995-1996 study, please visit the [MIDUS](#) website.

### **Variable Description and Frequencies**

**Note:** Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

## A1PB37: Number of non-biological children

How many other children do you have, including step children, adopted children, and any others you helped to raise for at least five years?

[Interviewer: If necessary clarify: "Please include only living children."]

[If QB37 = 0 or don't know, go to QE1]

[If (QB35 + QB37) = more than 10, ask QB37 (A-D) for (10 - [QB35]) children]

[Ask QB37 (1-10) D only if QB37C = 1994 or 1995]

## A1SA23: Waist around navel (inches)

The next questions are about body measurements. We have enclosed a tape measure to help you. It is yours to keep. The information will be more accurate if you follow these suggestions:

- Make measurements while standing
- Avoid measuring over clothing (even thin clothing can add a 1/4 inch)
- Try to record answers to the nearest quarter (1/4) inch
- Use the diagram on the right side as a guide

What is your waist size - that is, how many inches around is your waist? Please measure at the level of your navel.

## A1SA25: Height (inches)

The next questions are about body measurements. We have enclosed a tape measure to help you. It is yours to keep. The information will be more accurate if you follow these suggestions:

- Make measurements while standing
- Avoid measuring over clothing (even thin clothing can add a 1/4 inch)
- Try to record answers to the nearest quarter (1/4) inch
- Use the diagram on the right side as a guide

## A1SA38K: Ever attended other self-help/support group

The next questions are about self-help groups, by which we mean groups organized and run by people who get together on the basis of a common experience or goal to mutually help or support one another. (Groups organized and led by doctors, psychologists, social workers, or other professionals do not qualify as self-help groups). Please indicate in the first column whether you ever attended a meeting of one of these self-help groups at any time in your life. For each group you attended, record in the second column how old you were the first time you attended and record in the third column how many meetings you attended in the past 12 months. (If none in the past 12 months, enter "0").

## A1SF6A: Choose goals - Focus or keep options open

The next few questions are about the way you decide what you want out of life and how you go about trying to achieve your goals. For each situation below, two different strategies are listed. Please indicate whether your own strategy is more like the one listed in column A or the one listed in column B. While the way you do things may be different depending on the particular goal, and may include parts of both strategies, please circle the answer that

is true for you overall.

When choosing my goals...

Strategy A: I prefer to choose one or two important goals and really focus on achieving them.

Strategy B: I prefer not to limit myself - I keep my options open so I can take advantage of anything that comes up.

## A1SH1: Career psychological turning point

The following questions are about what we call "psychological turning points." Psychological turning points are major changes in the ways people feel or think about an important part of their lives, such as work, family, and beliefs about themselves and about the world. Turning points involve people changing their feelings about how important or meaningful some aspect of life is or how much commitment they give it.

With this definition in mind, in the past 12 months, did you have a psychological turning point that involved your job or career? This could be an experience like increasing the amount of effort you put into your job or career, cutting back on your job to spend more time with your family, deciding to change careers, now or in the future, or leaving your job to do something different.

## A1SH2: Upset for friend psychological turning point

Another kind of psychological turning point involves learning something new and very important about a person close to you. What these turning points have in common is the realization that this person is not the person you thought they were, either for the better or for the worse. This could be things like someone close to you making a major change for the better, finding out that he or she is doing something you disapprove of strongly, or learning that he or she is a stronger person than you thought.

First, in the past 12 months, have you had a psychological turning point like this where you learned something very upsetting about a close friend or relative?

### A1SI13D: Not working or looking number of weeks (12 months)

Now please think about your work experience over the past 12 months. In the spaces provided below, please write in the number of weeks you spent in each of the following work situations. The total should add up to 52 weeks. (Your best estimate is fine.)

In the past 23 months, how many weeks were you not working at a paid job and not actively looking for work (for example, you were retired, at home caring for children, or a student)?

## A1SP23: Who does more household chores

Running a household involves a lot of chores, and couples vary in who does these things, like cooking, shopping, laundry, cleaning, yard-work, repairs, and paying bills. Overall, do you do more of such chores, does your spouse or partner do more of them, or do you split them equally? If you have children, do not count child-rearing tasks such as bathing them, taking them places, or helping them with their homework, but do include chores like doing their laundry, washing their dishes, or cooking for them.
